DETAILED ACTION

Allowable Subject Matter

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests a phase alignment system as the current application. A U.S publication No.: 2002/0071510 by Drerup et al. is a very close art to the current application, however, Drerup et al. doesn't teach the same clock alignment method as the current application. More specifically, the current application teaches interfacing a first device with a second device; clocking at least a portion of the second device with a first clock signal; transmitting a clock signal source from the second device to the first device; transmitting a second clock signal from the first device to the second device, wherein the second clock signal is the clock signal source delayed by a propagation delay; adjusting a phase of the clock signal source such that a phase of the second clock signal is substantially in alignment with a phase of the first clock signal; transmitting data clocked by the second clock signal from the first device to the second device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
